Personal Profile

After studying mechanical engineering, I worked in the petroleum industry. as a senior field engineer and supervisor. I am highly motivated, and self-disciplined and always strive to achieve very high standards. I have always had a passion for Computer Science and new technologies. Through this passion I started reading articles, watching videos and seeing where I'd like to be in the future.

After moving to the UK, I decided to pursue my dream of becoming a web developer. I started a self-funded, full-time course in June 2019 at Just IT. I successfully completed my course including my projects where I used different languages such as HTML, CSS, JavaScript, C# and ASP.NET.

After the coronavirus, I have decided to further study part-time web development.

Started Software bootcamp with Firebrand, and successfully I passed AZ-900, AZ-204 and ITS-303 exams.

I am doing part time jobs for some time to cover the bills , with Amazon and Domino's.

My ambitions for the future are to fully develop my expertise and find a role where I can continue to learn more and establish myself within the development industry.

Education and IT Training

12/2022-03/2023

Firebrand Training Skills Bootcamp

Microsoft Software Engineer – Python

- Microsoft: Azure Fundamentals AZ-900 (Jan 2023)
- Associate Pearson IT Specialist- Python Fundamentals ITS-303 (Mar 2023)
- Developing Solutions for Microsoft Azure-AZ-204 (June 2023)

06/2019-12/2019

Just IT Training Ltd, London

Development Professional Programme

- Software Development Fundamentals including HTML, CSS, JavaScript, C# and ASP.NET

09/1999-07/2004

Assiut University, In Assiut, Egypt

Bachelor of Mechanical Engineering -Power Section

Core Modules:

Thermodynamics, Heat transfer and Fluid mechanics

Project Grade:

83%

Final Year Project:

"Cooling System by using radiant panels"

09/1996-07/1999

Galal Fahmy School in Cairo, Egypt

A Level:

Egyptian A-levels (in all scientific subjects) with an average pass rate of 75% which is equivalent to an A+

IT Skills

Software Development Skills: C#, ASP.NET, PHP, Python, Azure and SQL

Web Technology: HTML5, CSS3, JavaScript, Bootstrap and JQUERY

Core Programming Languages: C#, ASP.NET

Basic knowledge: Laravel, Google Analytics and SEO

Projects:

1. **Weather application** - You can get the current weather condition by using this app, at the landing page you will have 2 options device location or city name. I used HTML, CSS, and JavaScript to build this App.
2. **The Muppet Show Database** - it's a database for the famous comedy TV show The Muppet Show. I used ASP.NET Mvc5, SQL and C# to create it.

3. **Online Shopping Store** - a dynamic shopping online website with a functional database for products and categories, with secure access to the registered admin dashboard which can add, remove or update the products. This entire process is the CMS. I used ASP.NET MVC5, SQL, jQuery, API and C# to create it.
4. **Units Converter**- The aim of this project was to create a fully functioning units converter website using HTML, CSS and JavaScript.
On this website, I can easily add, edit, update or delete new categories for the measurements list. Also, it is a responsive website.
5. **Currency Converter**- The aim of this project was to create a fully functioning Currency Converter using HTML, CSS, JavaScript and APIs.
On this website, All the available currency exchange rates are always updated by using APIs. Also, it is a responsive website.

Interests and Achievements

Hobbies: I enjoy listening to music, sports and travelling. I also have an interest in current affairs and read intensively. In my spare time, I like to go out to social events with friends, as well as cultural and educational events. Also, I enjoy watching science fiction movies.

I recently decided to take part in some charitable activities and will be participating in a 'Walk to Remember' in support of Alzheimer's.
